# The Mark Engelstad Pacific Northwest Collection of US Large Cents

I am thrilled to offer the Mark Engelstad Collection of US Large Cents. Every coin has been graded by the Professional Coin Grading Service and the PCGS grade is noted on every coin. This is the number four register set of US Large Cents by Red Book Variety in the PCGS Set Registry. The majority of these coins have above average color and surfaces as well as superior eye appeal. Please call quickly to reserve coins from this collection. Second choices are appreciated as I expect multiple orders for many items. In addition to phone orders I will have this collection available and on display at the Long Beach California Convention September 26th-29th and at the Baltimore Convention November 15th-18th.

Please note we will be holding our next auction September 24th in association with Goldberg Auctions in Beverly Hills, California. The Annual Colonial Coin Club Auction will be held December 1st in association with the Bay State Coin Show in Boston. We are presently accepting consignments for our future sales.

I will be attending the Long Beach Convention September 26th-29th, the Baltimore Convention 15th-18th, the Bay State and C-4 Convention November 30 - December 2, and the Florida United Numismatists Convention in Orlando January 3rd-6th. I hope to see some of you there.

1793 S-13 R4- PCGS G4 $9,000
Nice dark chocolate brown. The obverse stronger; the reverse with some weakness at the periphery. Problem free and attractive for the grade. I believe this is a type very difficult to find in a PCGS holder in any grade.

1794 1C
PCGS FR02
Starred Reverse
1374.02/13867229

1794 S-48 R5 PCGS FR2 $12,500
Medium chocolate. The surfaces are basically smooth. The obverse is much stronger with a readable date and even some hair detail in the lower curls. The reverse is weaker, as always, with only traces of the legend, but close to a third of the 94 stars showing. An unusual situation where the EAC grade is at least a point or two better than the PCGS grade, though I imagine very few starred reverse 1794s are in holders of any grade

**1794 S-64 MISSING FRACTION BAR REVERSE**

1794 1C
PCGS F12
No Fraction Bar
Series: 8 Coin: 2D
911375.12/21472187

1794 S-64 R5- PCGS F12 $1,950
Brown with smooth surfaces and a strong strike. On this variety, often the reverse is so softly struck that the fraction is not visible, but here the fraction is strong and the missing fraction bar feature is clear. There is a small worn scratch central reverse, but otherwise there are very few marks. There are few problem free middle grade examples of this variety.

**1794 S-72 HEAD OF 1795**

1794 S-72 R2 PCGS VF20 $2,000

Smooth light chocolate. A tiny rim mark K9, otherwise virtually flawless. This Redbook type is deceptively difficult to find nice.

**1798 S-154 FIRST HAIR STYLE**

1798 S-154 R4+ PCGS AU50 $4,000

**Davis-Rice-French**
**Breen Plate-State IV**
1446.06/03220866

1799 S-188 PCGS G6 $6,995

This is a fabulous large cent. As a standard 1799/8 large cent this has strong VG plus detail. Even dark, chocolate brown. Slightly compromised by some light pinscratches and even granularity. G6 is probably a fair net grade. But this is the rare terminal die state with a massive die break running through TY of LIBERTY to the rim K3. This is the discovery specimen for the die state and the 2nd finest known of the die state (The finer F12 specimen is impounded in the ANS Museum) and the finest available to collectors. Comes with an impressive pedigree. Robert Coulton Davis, New York Coin & Stamp Co. 1/1890, David Proskey, M. A. Brown, S.H. & H. Chapman 4/1897:1079, Geo. W. Lustrous chocolate with a sharp strike and some faded red in the protected areas of the reverse.

**1803 S-264 LARGE DATE, SMALL FRACTION**

1803 S-264 R5 PCGS AG3 $9,500

Brown with smooth surfaces. There is a small rim bump K7 obverse. A few other marks, but pretty close to problem free. This example is from the later die state with the strong rim break K9-K1 reverse which has now filled in obliterating STA of STATES. The LIB of LIBERTY on the obverse is also weak. Perhaps this is why PCGS graded this AG. The reverse is full with a complete fraction. The date is also full. By EAC standards this would grade at least G4. Very few examples of this variety will make it into a PCGS holder.
